Systems and full-stack engineer. ICPC regionalist, two Play Store government apps, 47 merged pull requests into projects I do not own.

Experience

NeoSapien — *AI Engineer Intern, wearable-AI product, reported to the CTO (Bangalore)* **Jun – Aug 2026**

- Shipped Command-Mode Iteration 4 of an agentic assistant (Python/FastAPI backend, Flutter client): a tool suite spanning Slack, Telegram, Gmail, Calendar, device alarms and food ordering over a public MCP, each tool behind an opt-in scope with tests, plus a money-gate tier for any tool moving real funds.

Dept. of Labour, Govt. of Madhya Pradesh — *System Analyst Intern, client: MPSEDC (Indore, onsite)* **Dec 2025 – Mar 2026**

- Built e-SAHAYAK, a full-stack platform in Flutter and TypeScript managing employer and worker relations and rights awareness.

CytoScan Intelligence Technologies — *Data Infrastructure and ML Intern, IIT Jodhpur linked (Remote / Chennai)* **Sept – Nov 2025**

- Built a preprocessing and quality-control pipeline over BraTS 2023 MRI data covering 1,250+ patients, benchmarked against the state of the art.

Projects

YES, MP Government Wellness Platform [Play Store] — *Flutter, Node.js, PostgreSQL* **Sept – Oct 2025**

- Backend for a state wellness platform at roughly 5k concurrent users, launched by the Chief Minister of Madhya Pradesh. Killed a booking race condition with PostgreSQL row-level locking that was double-allocating slots under peak load.

Project SENTINEL, explainable anti-money-laundering [GitHub] — *PyTorch Geometric, GraphSAGE, Neo4j, FastAPI* **Jan – Feb 2026**

- Graph neural network detecting anomalous transaction clusters across 1M+ graph records, with a SHAP explainability layer giving analysts feature-level reasons for every flag rather than a score to trust.

Open Source

47 pull requests merged into 25 projects I do not own, across CNCF, Bitcoin and Lightning, container tooling and ML.

- Open Policy Agent (CNCF graduated): fixed silent precision loss for integers above 64 bits in Rego arithmetic and aggregates, which meant authorization decisions were being computed on wrong numbers. 169 lines, and two separate citations in the v1.19.0 release notes.

Achievements

- ACM ICPC 2025: rank 12 at the Mysuru on-site regionals, 4 problems solved.
- LeetCode Knight, 1008 solved, max contest rating 1997. CodeChef 4 star, max 1838. Codeforces Specialist, max 1539. AtCoder, max 641.

Skills

- **Languages**: Java, Python, JavaScript and TypeScript, C/C++, SQL, Bash, Rust, Solidity
- **Backend and Web**: Spring Boot, FastAPI, Node.js and Express, Next.js, React, Flutter, PostgreSQL, MongoDB, Supabase
- **AI and Data**: PyTorch, PyTorch Geometric, TensorFlow, Flower, GraphSAGE, SHAP, Pandas and NumPy, Neo4j, MLflow
- **Infrastructure**: Docker, GitHub Actions, Linux, Prometheus, Grafana, K6, AWS, OCI

Education

Shri G. S. Institute of Technology and Science, Indore — *B.Tech, Mechanical Engineering (Minor in Machine Learning)* **Sept 2023 – July 2027**
